ABOUT US

Founded in the mid-2011s, Prodigy Industries began as a family enterprise built on hands-on craftsmanship and a commitment to dependable safety wear. From selecting leather by hand to developing garment patterns, our founders established a personal approach to quality that continues to guide the business.

Today, Prodigy Industries manufactures safety wear and personal protective equipment through production facilities across Pakistan, including its own leather tannery. Our logistics and sales operations are headquartered in Pakistan, with a sales office in the United States supporting international customers.

We remain proudly family owned. Long-standing customer and supplier relationships reflect the values on which the company was built: personal commitment, ethical business practices and trust.

Our workwear collection brings together garments for industrial teams and specialist working environments. We work with customers to develop products suited to their requirements, supported by the experience and care behind every Prodigy Industries product.
